

INFORMATION: Transportation Curriculum Coordination
Council (TCCC) 2001 Work Plan Update

Madeleine Bloom, Director
Office of Asset Management

HIAM-20

Resource Center Directors, Federal Lands Highway Division Engineers, Division Administrators

The Transportation Curriculum Coordination Council held its summer meeting in Williamsburg, VA, June 5 & 6. As part of that meeting five technician and certification regional groups along with associate members from AASHTO, State Transportation Agencies, Industry and friends of TCCC developed its work plan for 2001/2002. The work plan supports the desire of the TCCC to cooperate in the development of a curriculum, in construction, maintenance, materials, project management, and associated transportation disciplines. The work plan has been designed to assist in the improvement of skills and abilities of the participants, while maximizing member resources through concerted efforts in the development of training and qualification mediums; promoting uniformity in training content and qualification requirements; and sharing training and qualification materials and techniques nationwide.

This memo and attachment is an update of the TCCC's initial work plan and should be disseminated to those individuals interested in the latest information on the development of materials used for training and certification of inspectors, technicians, and testers. The next scheduled meeting of the TCCC is for December 4 – 5, 2001 in New Orleans, LA. Agenda items will cover the latest accomplishments of TCCC members, and also the development of priorities for the next year. Also for your information, during the summer AASHTO meetings the Subcommittees on Construction and Materials forwarded their resolutions for a National Pooled Fund project to be developed to support this program. We expect action on these recommendations during the SCOH meeting this December. For further information, please contact Howe Crockett of FHWA-WFL 360-696-7750, hcrockett@fhwa.dot.gov or John Perry of FHWA-HQ-HIAM 202-366-2023, johna.perry@fhwa.dot.gov.
